WHY CLIENTS CHOOSE US?

WE OFFER WORLD CLASS EXPERTISE

WE DIGITALLY TRANSFORM ENTERPRISE

WE HELP ACHIEVE BUSINESS GOALS

OUR TECHNOLOGY SERVICES

IT Infrastructure

Design & implementation services ranging from workplace management, server management, network management, data backup & recovery, enterprise managed services to meet all needs of business.

Cloud Computing

Cloud computing is increasingly gaining significance and we help clients with our cloud advisory services, cloud enablement services and cloud managed services to maximize performance and minimize costs.

Cyber Security

We combine our trusted security expertise with our business understanding, helping clients solve complex security challenges, strengthen their security postures and reduce risk in the face of a dynamic threat landscape.

Data Leakage Protection

In today's world companies handle vast amounts of data that is increasingly easy to access & share and vulnerable to leaking. Our DLP solutions have defined purpose in a structured, systematic manner that incorporates people, process and technology.

Business Continuity & DR

We help clients in architecting, design & implementation of BCP & DR solutions such that the identified applications, customers and locations keep functioning in the event disruptive events occurring encompassing hardware, software, facilities, personnel, communication links and applications.

Data Center

Data Centers are mission critical facilities. We can design, architect, implement and manage data centers with a unified approach to physical and logical systems architecture to address the needs of availability, agility, integration and security.

5

OUR CONSULTING & APPLICATION SERVICES

Strategic IT Consulting

We develop IT strategies to transform IT into a true business enabler. We prepare and deploy IT strategy implementation roadmap leveraging client's current IT assets to the best extent and identifying solutions to meet current & future business needs.

CIO on Demand

This service is based on our years of practical CIO experience in the corporate sector with several MNCs. As CIO, we will work with users, management, IT team and vendors to develop & deliver IT strategy and coaching IT to build their capability.

Project Management

We provide a focused set of Project Management services to support clients manage complex project portfolios, efficiently coordinate resources without compromising on quality to drive project success and achieve business results.

Enterprise Applications

We help clients in selection, design, implementation and maintenance of enterprise applications like ERP, CRM, BI. With our vast experience and knowledge in industry leading solutions for large enterprises as well as SME sector we boost your productivity and smoothly run your business.

Web & Mobile Apps

To meet your specific business needs we develop custom applications ranging from websites, web-crawlers, web apps and mobile apps. We choose the most appropriate technology and platforms to deliver superior customer value based on your project objectives, project size and project budget.

Artificial Intelligence

AI is getting increasingly integrated in everyday work of corporates and its no longer considered science fiction. We help you implement AI based solutions such that you can consider AI as a new member of your team who is a fast learner, capable of multi-tasking, diligent and always available.

CUSTOMER TESTIMONIALS

Navneet K. Gupta
Designated CEO
C&C Constructions Pvt Ltd

"7 dot 2's value proposition is immense. We get best in class IT support (wide spectrum) at very effective cost. This creates win-win for both. Wish you continue maniacal customer focus and grow"

Vinod Kohli
Managing Director
QGS Infotech Pvt Ltd

"We have been associated with 7 dot 2 for many years and our overall experience working with them is AMAZING. They have assisted us improving our IT systems and SOPs, steering us towards more efficient and better managed company"

Niraj Khandelwal
Director
Manglam Electricals

"7 dot2 successfully implemented our CRM & ERP and other IT infrastructure related services since December 2018. Their expertise coupled with collaborative and innovative spirit makes them our go-to-expert for our most significant projects"

CASE STUDY

IT Infrastructure Audit

Client
JV between Indian and Japanese companies and a leader in manufacturing of construction equipment in India

Challenge
Client's dealers across India were experiencing poor performance due to their IT Infra setup in using SAP solutions for sales process and after sales support management.

Solution
7 dot 2 conducted onsite audit of key areas impacting application performance – network, hardware, software, security, environment, general survey.

Benefit
Client's IT team had a thorough data backed report identifying the IT infra strengths and improvement areas in their dealer environment to take specific actions.

CASE STUDY

IT Infrastructure Consulting & Implementation

Client

Fast growing manufacturing company in Delhi NCR serving domestic and international customers in automotive, mining, hydraulics & other light engineering industries

Challenge

Modernize their existing IT Infra setup and design & implement modern IT infrastructure for their greenfield factory.

Solution

7 dot 2 designed and implemented solutions in IT networking, data backup, cyber security, user authentication and IT talent hiring.

Benefit

Client has a robust IT infrastructure with optimal capital IT investment, low maintenance costs, higher user productivity and laid the right platform for future enterprise applications rollout.
